Peter Mountain

A showcase of new works by Peter Mountain, a sculptor currently researching computer aided design with the support of Salford University.

Opening Event: Tuesday 16 March 6pm to 8pm

Peter Mountain is a sculptor currently researching computer aided design (CAD) and computer aided manufacture (CAM) supported by Salford University within the Centre for Virtual Environments.

By harnessing the processes normally associated with the industries of rapid prototyping, packaging, computer gaming design and digital surveying and scanning, Peter has manufactured new sculpture. This exhibition showcases some of these new works but can also be seen as a documentation of his journey so far.
